

Company Security Officer Course

Introduction

This training follows the IMO Model course 3.20, with the aim to provide participants with a firm understanding of the purpose of the ISPS Code and current maritime security threats and patterns relating to shipping and ports. The training provides awareness on the recent conventions that are applied onboard vessels, engaged on international trade. Participants will be embedded with the knowledge of current security threats affecting international shipping industry and the interfacing measures with port facilities serving international ships. This training will enable participants to understand the reality of today's security issues on a global scale and how it can affect trade and commerce. Participant's mindset will be enlightened to see the seriousness of current security threats ranging from piracy, terrorism, contraband, smuggling, collateral damage, cargo theft and etc, which affects shipping and ports all around the globe. This training aims to motivate participants to acquire the required knowledge and skills to competently perform in their capacity as company security Officers to ensure ships are managed well to comply with the ISPS Code requirement and flag state's obligations.

Objectives

This course is aimed at ship owner's, ship managers, ISM Internal Auditors, shore based DPA's and shore based designated company security officers. The training aims to provide a good understanding of the ISPS Code requirements especially at a managerial position in a shipping company. The knowledge will provide a good base understanding to effectively implement systems and procedures to comply with the requirements of the ISPS Code, for vessels engaged on international trade.
