

ENCLOSED SPACE ENTRY PROCEDURE

Introduction

The enclosed space entry procedure course is designed to prepare officers and crew members joining ships to become aware of the dangers involved with work and entry into enclosed spaces on board the ship. The candidates are informed of the risks associated with enclosed spaces and trained to prevent accidents by taking suitable precautions while working in enclosed spaces.

Objective

To improve awareness of all the officers and crew about the dangers involved with enclosed spaces and company's procedure for entry and working in enclosed spaces. To reduce the incidence of accidents on board due to non-compliance of procedures required for entry into enclosed spaces.

Outcome

By the end of the course an employee would be aware of the following:

- Enclosed Space Entry Procedures.
- Types and importance of ventilation.
- Atmosphere testing and monitoring.
- Space preparation for entry.
- Rescue arrangements and resuscitation equipment at the entrance.
- Supervisory control and experienced person in attendance at the entrance.
- Communication arrangements between the supervisor and entrants.
- Safe access and illumination.
- Personal protective equipment's.
- Breathing apparatus.
- Permit to Work.
- Training requirements for Confined Space Entry.
- Emergency Drills.
- Actions by Emergency Rescue Team in the event of an emergency.

Outline

This training course will cover the following areas.

- Case study of enclosed space entry incident, identification and hazards of enclosed spaces

- Use of free fall preventer device, company's procedures, company checklists and forms
- Tank tagging procedures, gas freeing and ventilation, case studies. Stop work authority.
- Gas freeing and ventilation methods. Usage and limitations of gas measuring equipment
- Testing of atmosphere prior entry
- Mock up exercises – Entry, evacuation and rescue from enclosed space.

Training Facilities

The theoretical part of the course is conducted in a spacious classroom with modern teaching aids to facilitate comfortable learning. The practical exercises are conducted at an enclosed space mock up.

Certificates

The trainee will receive a certificate of attainment after successfully completing the course.
